

TfN Decarbonisation Strategy Stocktake and Action Plan – Partner Update

Scrutiny Committee – 21 November

A Fair and Prosperous Transition

- A stocktake at each milestone in trajectory – requirement of 2021 Strategy
- Updating our surface transport carbon footprint for the North from 2018 to 2023
- Aligning with our STP ambitions
- Using the evidence, insights and data we've generated since 2021

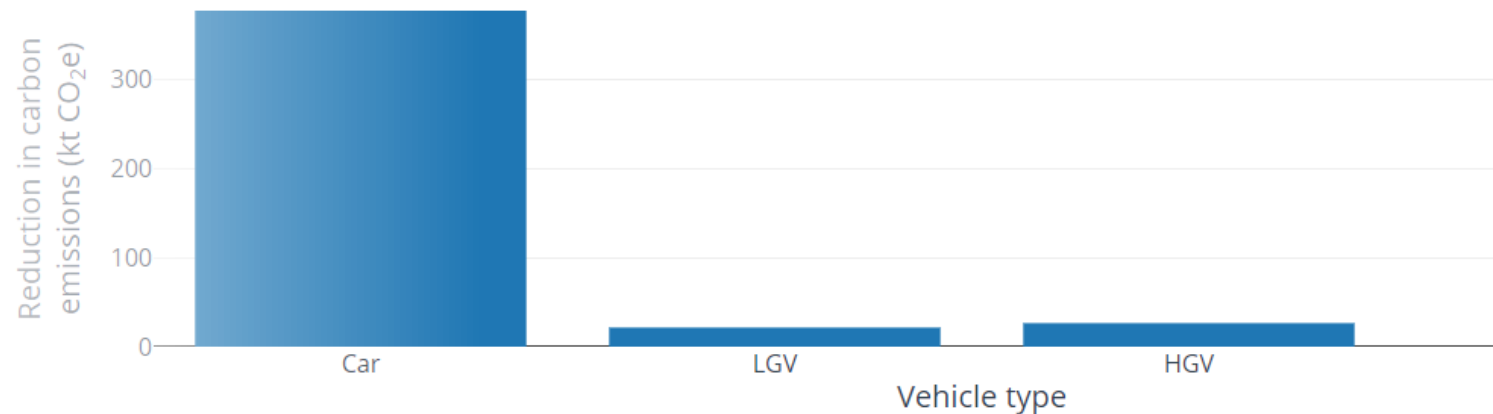

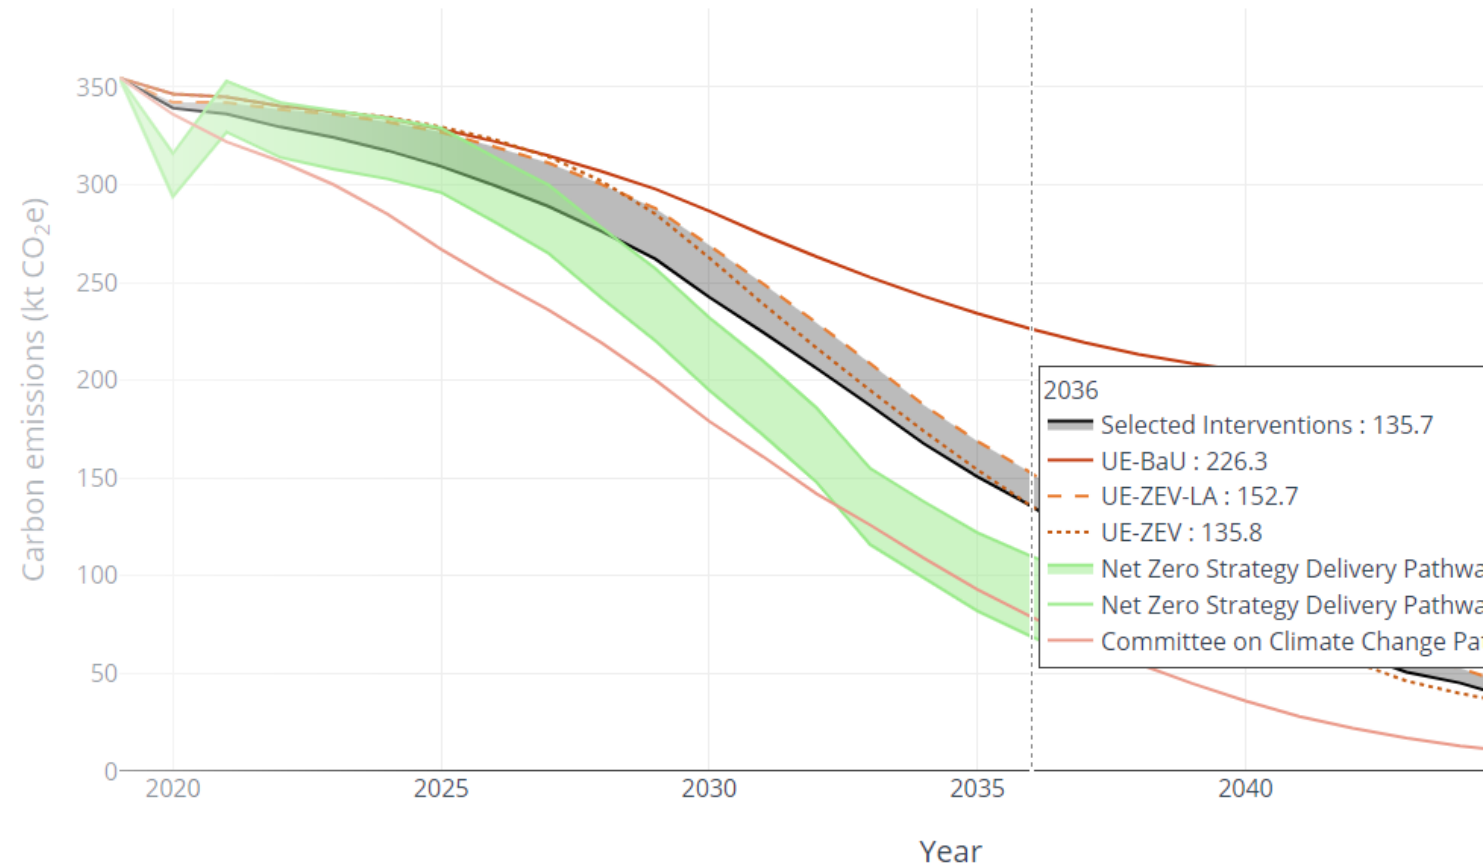

Key Dates

Partner 1-2-1 Engagement	September to November 2024
Updating carbon footprint and decarbonisation pathway	September 2024 – December 2024
Partner update on pathway proposals – if required	March 2025
Decarbonisation Strategy Stocktake and Action Plan - TfN Board	June 2025
Carbon Assessment Playbook Launch	Early 2025

TfN's Carbon Assessment Playbook (CAP)

- Policy builder tool to help authorities to understand the 'emissions gap' in their areas.
- Quantify the carbon impact of their strategies or plans.

TfN's Climate Change Vulnerability Assessment

- Mapping the vulnerability of our strategic transport networks to flooding, extreme temperature, high winds and ground instability.
- Phase 2 to extend mapping to local road network for use by partners.
- Potential to combine with TRSE and Natural Capital opportunities datasets.
